

FOLLOW THE SAME SCORE LINES FOR ALL TENTS
AND PRODUCE DISPLAYS AS BELOW.

MARKET STALL INSTRUCTIONS

1. Score along lines marked with a red arrow:
2. With a sharp knife, cut around the perimeter of the tent, not forgetting the two long slots between the inside wall sections.
3. Fold up the inside wall sections along line **A** and glue to the back of the outside walls to form a double thickness.
4. Fold the completed end walls forward at right angles.
5. Fold the roof along the scored lines and, with a thin bead of glue, attach the edges to the top of the end walls.
6. In a similar way, score and cut out the produce display.
7. Fold up the bottom section of each side panel along line **B** and glue inside the top section to form a double thickness.
8. Fold the top and sides panels forward at right angles and glue the edges of the sloping top. Then fold in and glue the end tabs **C** behind the front panel.
